DETAILED ACTION

Allowable Subject Matter

1. Claims 23-36 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 6,170,318 to Lewis. Is the reference closest to the claimed invention. Lewis discloses a method for monitoring the progression of a plume of escaped dangerous gas, the method comprising: transmitting sensory data from a first sensor array comprising sensors capable of producing a first response in the presence of a chemical stimulus to a remote location; transmitting physical data from a second sensor array comprising sensors capable of producing a second response in the presence of a physical stimulus to a remote location, wherein said physical data is generated by a sensor of said second sensor array selected from the group consisting of an optical sensor, a mechanical sensor, a radiation sensor, a thermal sensor and combinations thereof; and processing the sensory and physical data at the remote location, thus monitoring the progression of the plume. However, Lewis does not teach said processing comprises analyzing the combination of said first and second responses; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
